### Abstract

The aim of the research to evaluate and discuss about importance online education to student. This paper provide the impact on online education to student and online education challenge to student. It is important because to find about advantage and what challenge have in online education. Online education refers to an education system which involves electronic media and information, and communication technologies. Another is online education can be definite as an approach to teaching and learning that utilizes internet technologies to communicate and cooperate in an educational context.

**Keywords:** Education, technologies, online, student

### INTRODUCTION

Online education refers to an education system which involves electronic media and information, and communication technologies. Another is online instruction can be distinct as a way to deal with instructing and discovering that uses web advances to impart and coordinate in an instructive setting. This incorporates innovation that augmentations conventional classroom preparing with electronic segments and learning situations where the instructive procedure is experienced on the web. Another is online training can use time effectively the efficient components presented by electronic training devices like Course Info apply to both the teacher and the understudy. They don't need to invest energy strolling crosswise over grounds to the teacher's office or scanning for a perusing in the library. Likewise educators can minimize time spent in available time, and address understudy concerns online. Online training likewise Reduce workforce workload educators can likewise spare time utilizing items like Course Info. Time before spent redressing, defining factual deviations, and breaking down particular inquiries can be utilized for different things. Other than that online training can amplify the classroom encounter. Teachers working with devices like Course Info no longer need to invest significant classroom energy managing. Understudy must think about significance online instruction and get this procedure since it utilize advances and take after pattern in now days. Another is online training must acquaint with society. We pick this subject for the examination since it is reasonable for this time have advances to use for online training and numerous individuals utilized of online instruction as a part of now days. At that point, from the writing audit, we get 3 sub theme to utilize first is the effect of online training to understudy.

The effect to understudy for online instruction they can't utilize numerous time for get learning and talk for instance can't set aside opportunity to run classes with utilize web

anyplace they can get it. Furthermore is correlation between online instruction and classroom training. They can analyze about online instruction and classroom training which regards use in now days and can utilize innovations for get each data. Next sub point is process learning in online training. Presently understudy and educator must think about process learning in online training it simple to utilize and appropriate for all level instruction. Presently understudy can dissect what regards use for training in now days and can see what critical have in online instruction. Sub point appear for this exploration need to give more data about vital online instruction to understudy.

## ISSUES

In this paper, we identify some of the issues about importance online education to student. Created on my opinion from the observation about importance online education are:

- ✓ No face-to-face interaction between student
- ✓ Must use internet every time for get information and discussion.
- ✓ No have real communication between student.

## RESEARCH QUESTIONS

- ✓ How to introduce to student about importance online education in now day?
- ✓ what advantage have in online education to student in now days?
- ✓ What level education can use online education?

## RESEARCH OBJECTIVES

The purpose of this paper is to appraise the level of information literacy consciousness between importance online education to student. Based on information use I identify the goals.

- ✓ To show what different online education and classroom education.
- ✓ To suggest for student about online education more attractive to use.
- ✓ To improve education skill student with use online education. Technology has become the important to a new world of education.
- ✓ To introduce about importance online education toward student.

## LITERATURE REVIEW AND PROPOSED FRAMEWORK

Online education refers to an education system which involves electronic media and information, and communication technologies. Another is online education can be

definite as an approach to teaching and learning that utilizes internet technologies to communicate and cooperate in an educational context. Online education also can utilize time efficiently the time saving elements introduced by web-based education tools like Course Info apply to both the instructor and the student. Other than that online education can help to maximize the classroom experience.

The impact to student for online education they cannot use many time for get knowledge and discussion for example cannot take time to go classes with use internet anywhere they can get it. Secondly is comparison between online education and classroom education. They can compare about online education and classroom education which is good to use in now days and can use technologies for get every information. Next sub topic is process learning in online education. Now student and teacher must know about process learning in online education it very easy to use and suitable for all level education. Now student can analyze what is good to use for education in now days and can see what important have in online education. Sub topic show for this research want to provide more information about important online education to student.

Reality an online understudy will function admirably for the individuals who have the ability to self-inspire. Without an arrangement or some sort of association, work will endure in the online classroom, yet in the event that you set due dates and organize your school plan. For this circumstance understudy must guide each movement need to get their objective in study with utilize advancements. Another is understudy must know each and take care of each issue have for this situation. Thierry Karsenti Simon Collin (2011), the fundamental potential effect of recordings on educator preparing is that they let pre-benefit instructors to suspect genuine classroom circumstances so they can enhanced get ready for them. At any rate the preparation program allows instructor to rise the substances of classroom training.

Based on my analyze article another impact of online education is Jung Wan Lee Kip Becker Helena Nobre, (2012), From the group connections viewpoint, social-constructivist methods counting cooperative learning and social communication are important backgrounds for emerging sureness with respect to using an online learning system.

Online education have benefits to taking online course is that they flexibility to the student. This is a great option for those who already have a time commitment with family and work. Even if you hopeful for a little flexibility on campus course typically offer and evening schedule so you can coordinate with your daily commitment. One thing you need to remember to factor in is where you live and work in proximity to the campus. Iain McPhee Tor Söderström, (2012), the findings show that, despite a fast technological development which the modern years has changed teaching and learning conditions, both the Swedish and the Scottish data tentatively propose that it is not

possible to claim that campus education is a better instructive option than distance or online teaching.

Technology has become the key to a new world of education. Online learning has become one of the most popular ways of gaining access to an education. On the other side, online learning has also its challenges. Alexis Kokkos(2014), the trainer shouldn't limit his work to contribution new information. He must also discuss critically with the trainees regarding their experiences and characters towards ICT, and help them redefine their pertinent assumptions and conduct in a useful way. Alexis. Kokkos(2014), At this opinion of educational or training programs, when the learners do not only add new information to their brain and do not simply learn about resolving a problem, but they also challenge and change their assumptions and actions regarding an issue at hand, transformative knowledge happens.

Figure 1. Research Framework.

When analyze of the literature review, I get decide research framework for my topic choice online education important to student in now days. Based on this framework we can know about the impact on online education to student and comparison between online education and learning classroom education another is process learning in online education. In this frame work recognize independent variable to appraise this issue.

## CONCLUSION

Research is the systematic examination and study of resources and sources to found facts and reach new conclusions, so it forms people's understanding of the world

around them. Through research findings, psychologists are able to explain individual's actions, including how people think and act in certain ways. This helps to determine disorders and their impact on the person and society, thus developing suitable treatments to improve the individual's quality of life. For online education important to students issue can integration of web-based learning mechanisms with software like Course Info bring added value to traditional education.
